

# SCHATTDECOR PRINTING HALL, THANSAU

Throughout the EU working conditions have been brought into line with regard to noise exposure. Relevant national limiting values have now been replaced by stricter limiting values for noise and vibration exposure..

In the course of test runs several printing units were fitted with a total of 14 vibration sensors and six microphones and subjected to a thorough on-site analysis.

**Schattdecor Printing Hall,  
Thansau Near Rosenheim,  
Germany**
