

TOWN BY-PASS, PFLAUMHEIM

Town by-Pass Pflaumheim, Traffic Development Planning, Germany

Project period
2007

Construction cost
7.75 M € approx.

Services provided

Determination of demand, traffic analysis, calibration of traffic model, forecast, investigation of variants

Technical details

The built-up area is heavily affected by the through traffic. A detailed as-built analysis of the road network and the traffic relations were the basis for an investigation of alternative bypass alignments to direct traffic away from the city centre. Each variant was examined regarding its traffic effectiveness.
