

FOOTBRIDGE, RAUNHEIM

Foot-bridge in Raunheim, Germany

Project period
2004 - 2009

Services provided

Project and structural planning with architectural design, statical and dynamic preliminary investigations

Technical details

Connection of the new housing development "An der Lache" with the city centre Raunheim, overall length of 130 m and a pylon height of 35 m, also crosses railway tracks and two roads, disabled-friendly design with cable-stayed structure creates an interesting urbanistic feature
