

BUS PRIORITY CORRIDOR, MOSCOW

Bus Priority Corridor, Moscow, Russian Federation

Project period
2005

Services provided

Selection of corridor on the basis of a deficiency analysis, development of measures for bus priority system

Technical details

During rush-hour Moscow's arterial roads are totally congested. Scheduled buses are hemmed in by the traffic and are thus also held up in traffic jams. For one selected corridor, measures will be developed which can then be adopted for similar corridors.
