

STORMWATER OVERFLOW BASIN, COLOGNE

Vortriebsmaschine

Startbaugrube (Schacht 3)

Stormwater Overflow Basin, Steinrutschweg, Cologne, Germany

Services provided

Project planning, electrical engineering, design, approval and execution planning, preparation of contract award, construction supervision electrical engineering

Technical details

The existing combined sewer DN 1000/1500 at Steinrutschweg in Cologne-Ostheim is to be connected to the already completed stormwater recovery collector. The connection to the existing sewer is to be ensured by means of a stormwater overflow basin and a new relief sewer DN 1000 and DN 1400 incl. flow metering technology
