

## Stormwater Treatment, Emscher Cooperative, Lot 1, Germany

**Project period**  
2004 - 2015

**Services provided**  
Overall planning

### Technical details

Construction of stormwater treatment plants, sewers and pumping stations for five catchment areas on the river Emscher in Gelsenkirchen and Herne.

The overall catchment area comprises approx. 1 290 hectares. Besides the project and structural planning, it is necessary to provide the sewer network calculation, mechanical and process engineering, associated landscape conservation planning, surveying and schedule planning.
