

Sewer Rehabilitation, Hohe Strasse, Am Hof, etc., Cologne, Germany

Services provided

Overall planning including appraisal of state of repair according to ATV-M 149, hydrodynamic calculation of sewer network planning.

Technical details

Renewal of sewers which require rehabilitation for structural and hydraulic reasons. The planning area comprises the pedestrian precinct "Hohe Strasse" incl. its delivery roads; furthermore, restrictions had to be observed with regard to the preservation of archaeological monuments, considering that the planning area is located in the historic city centre within the ancient Roman fortifications.
